CONTENTS OF VOLUME 10

Volume 10 Nos. 1–2 January–March 2001

1999 INTERNATIONAL HISTORY, PHILOSOPHY AND SCIENCE TEACHING CONFERENCE: A SELECTION

Associate Editors: Fabio Bevilacqua & Enrico Gianetto

Editorial	1–6
IGAL GALILI and AMNON HAZAN / The Effect of a History-Based Course in Optics on Students' Views about Science	7–32
NAHUM KIPNIS / Scientific Controversies in Teaching Science: The Case of Volta	33–49
HSINGCHI A. WANG and WILLIAM H. SCHMIDT / History, Philosophy and Sociology of Science in Science Education: Results from the Third International Mathematics and Science Study	51–70
ALBERTO CORDERO / Scientific Culture and Public Education	71–83
DAVID GRUENDER / A New Principle of Demarcation: A Modest Proposal for Science and Science Education	85–95
JAN CROSTHWAITE / Teaching Ethics and Technology – What is Required?	97–105
PANAGIOTIS PANTIDOS, KALLIOPI SPATHI and EVAGELOS VITORATOS / The Use of Drama in Science Education: The Case of "Blegdamsvej Faust"	107–117
MICHAEL R. MATTHEWS / Methodology and Politics in Science: The Fate of Huygens' 1673 Proposal of the Seconds Pendulum as an International Standard of Length and Some Educational Suggestions	119–135
ANDRE K. T. ASSIS and ARDEN ZYLBERSZTAJN / The Influence of Ernst Mach in the Teaching of Mechanics	137–144

FRITZ KUBLI / Galileo's 'Jumping-Hill' Experiment in the Classroom – A Constructivist's Analysis 145–148

LÁSZLÓ KOVÁCS / Georg von Békésy, Nobel Laureate in Physiology, Experimental Physicist and Art Collector was Born 100 Years Ago 149–152

FANNY SEROGLOU and PANAGIOTIS KOUMARAS / The Contribution of the History of Physics in Physics Education: A Review 153–172

RON GOOD and JAMES SHYMANSKY / Nature-of-Science Literacy in *Benchmarks* and *Standards*: Post-Modern/Relativist or Modern/Realist? 173–185

RANDY BELL, FOUAD ABD-EL-KHALICK, NORMAN G. LEDERMAN, WILLIAM F. MCCOMAS and MICHAEL R. MATTHEWS / The Nature of Science and Science Education: A Bibliography 187–204

News 205–208

Contributors 209–214

Volume 10 No. 3 May 2001

STUART ROWLANDS, TED GRAHAM and JOHN BERRY / An Objectivist Critique of Relativism in Mathematics Education 215–241

MANSOOR NIAZ / How Important are the Laws of Definite and Multiple Proportions in Chemistry and Teaching Chemistry? – A History and Philosophy of Science Perspective 243–266

JEROME VIARD and FRANCOISE KHANTINE-LANGLOIS / The Concept of Electrical Resistance: How Cassirer's Philosophy, and the Early Developments of Electric Circuit Theory, Allow a Better Understanding of Students' Learning Difficulties 267–286

ROBERTO DE ANDRADE MARTINS and CIBELLE CELESTINO SILVA / Newton and Colour: the Complex Interplay of Theory and Experiment 287–305

JOSÉ M. VAQUERO and ANDRÉS SANTOS / Heat and Kinetic Theory in 19th-Century Physics Textbooks: The Case of Spain 307–319

Contributors 321–322

Volume 10 No. 4 July 2001

ARTHUR STINNER / Linking 'The Book of Nature' and 'The Book of Science': Using Circular Motion as an *Exemplar* beyond the Textbook 323–344

IGAL GALILI and AMNON HAZAN / Experts' Views on Using History and Philosophy of Science in the Practice of Physics Instruction 345–367

JOSÉ CLAUDIO REIS, ANDREIA GUERRA, MARCO BRAGA and JAIRO FREITAS / History, Science and Culture: Curricular Experiences in Brazil 369–378

ANNA BINNIE / Using the History of Electricity and Magnetism to Enhance Teaching 379–389

MICHAEL N. FRIED / Can Mathematics Education and History of Mathematics Coexist? 391–408

GUILLERMINA WALDEGG / Ontological Convictions and Epistemological Obstacles in Bolzano's Elementary Geometry 409–418

Contributors 419–421

Volume 10 No. 5 September 2001

MARIA YAMALIDOU / Molecular Representations: Building Tentative Links Between the History of Science and the Study of Cognition 423–451

BO DAHLIN / The Primacy of Cognition – or of Perception? A Phenomenological Critique of the Theoretical Bases of Science Education 453–475

MORDECHAI BEN-ARI / Theory-Guided Technology in Computer Science 477–484

MARK J. LATTERY / Thought Experiments in Physics Education: A Simple and Practical Example 485–492

TAPIO KERANTO / The Perceived Credibility of Scientific Claims, Paranormal Phenomena, and Miracles Among Primary Teacher Students: A Comparative Study 493–511

Contributors 513

Volume 10 No. 6 November 2001

1999 INTERNATIONAL HISTORY, PHILOSOPHY AND SCIENCE TEACHING CONFERENCE: A SELECTION (PART TWO)

Associate Editors: Fabio Bevilacqua & Enrico Gianetto

ANTONIO MORENO GONZÁLEZ / "Weighing" the Earth: a Newtonian Test and the Origin of an Anachronism 515–543

SILVINA GVIRTZ, ANGELA AISENSTEIN, JORGE N. CORNEJO and ALEJANDRA VALERANI / The Natural Sciences in The Schools: Tension in the Modernization Process of Argentine Society (1870–1960) 545–558

GYULA J. RADNAI / How did Loránd Eötvös Choose a Research Topic? 559–568

F. JAMES RUTHERFORD / Fostering the History of Science in American Science Education 569–580

SIBEL ERDURAN / Philosophy of Chemistry: An Emerging Field with Implications for Chemistry Education 581–593

FRITZ KUBLI / Can the Theory of Narratives Help Science Teachers be Better Storytellers? 595–599

OLIVAL FREIRE JR. and ROBINSON M. TENÓRIO / A Graduate Programme in History, Philosophy and Science Teaching in Brazil 601–608

Contributors 609–611

Contents of Volume 10 613–616
